

Hinkson Creek CAM Science Team
DRAFT Notes of the June 18, 2012 Meeting

Team Members Present: Bob Angelo, Paul Blanchard, Joe Engeln, John Holmes, Jason Hubbard, Robb Jacobson, Dave Michaelson, Dan Obrecht, Barry Poulton

The team spent most of the meeting discussing the conceptual model that had been begun at the last meeting. Robb Jacobson went through the model that he has created and discussed some scenarios for potential actions and how each might be considered using the model.

At the end of the meeting, the team discussed how to present this material to the stakeholders and others. The various uses of the model were discussed as well as the need to consider it a work in progress that will be changed and expanded to meet the needs of the science team, action team and stakeholder committee.

The team discussed a meeting with the action team, at their request, to help prepare the first set of proposed actions.

The next Science Team meeting was set for July 18 at 3 PM at Allstate Consulting.
